

Welcome to PDFsharp

PDFsharp is the Open Source library that easily creates PDF documents from GDI+ or WPF.

The same drawing routines can be used to create PDF documents from GDI+ or WPF.

Version 1.30 is now available.

It can use either GDI+ or WPF.

It includes support for Unicode in PDF files.

It also includes MigraDoc Foundation which brings you a high level API for creating PDF documents.

Version 1.30 demonstrates how to mix PDFsharp and MigraDoc Foundation.
